PROFESSIONAL EXPERIENCE

COMPACT GYAN

Unity Developer

Ghaziabad, UP / India

10th May 2022 – 10th August 2022

Worked on more than 30 activities, required to build their official AR App (360XR Lab), hosted on Play store. I built study materials based on 3d modelling, animation, vocal teaching and application building in Unity 3D software for Nursery to 6 standards. The subjects included Math, English, Hindi and a few other subjects.

LEANEX CS STUFF

Blog Writer

Surat, Gujarat / India

2nd August 2021 – 2nd October 2022

Built various interactive, informative blogs and content on recent topics for readers.

PROJECTS (GitHub Link: <https://github.com/Harshcodess>)

ARIS (Augmented Reality for Interactive Studies)

- AR based android application to make students studies more interactive and interesting.
- Shows 3D animated models, videos, images and presentations on the markers after scanning through camera.
- Study of technology – Unity 3D, Vuforia Engine, Free 3D models.
- Uses C# for animations and operations in the application.

hPr MOTORS (Vehicle Rental Website) (Deployed Link: <https://hpr-motors.netlify.app>)

- Integrated online system for vehicle rental (cars, bikes and cycles).
- Study of Technology – CSS, ReactJS, Firebase.
- Records data of customers, vehicle selection and booking, security, cost effective, user friendly and easy to understand.
